

# Hostel Life

---

ABHAY KUMAR PANDEY (2002901520004/ CSAI /A)

NAMAN TIWARI (2002901550019/ CS-IOT)

# Objective

---

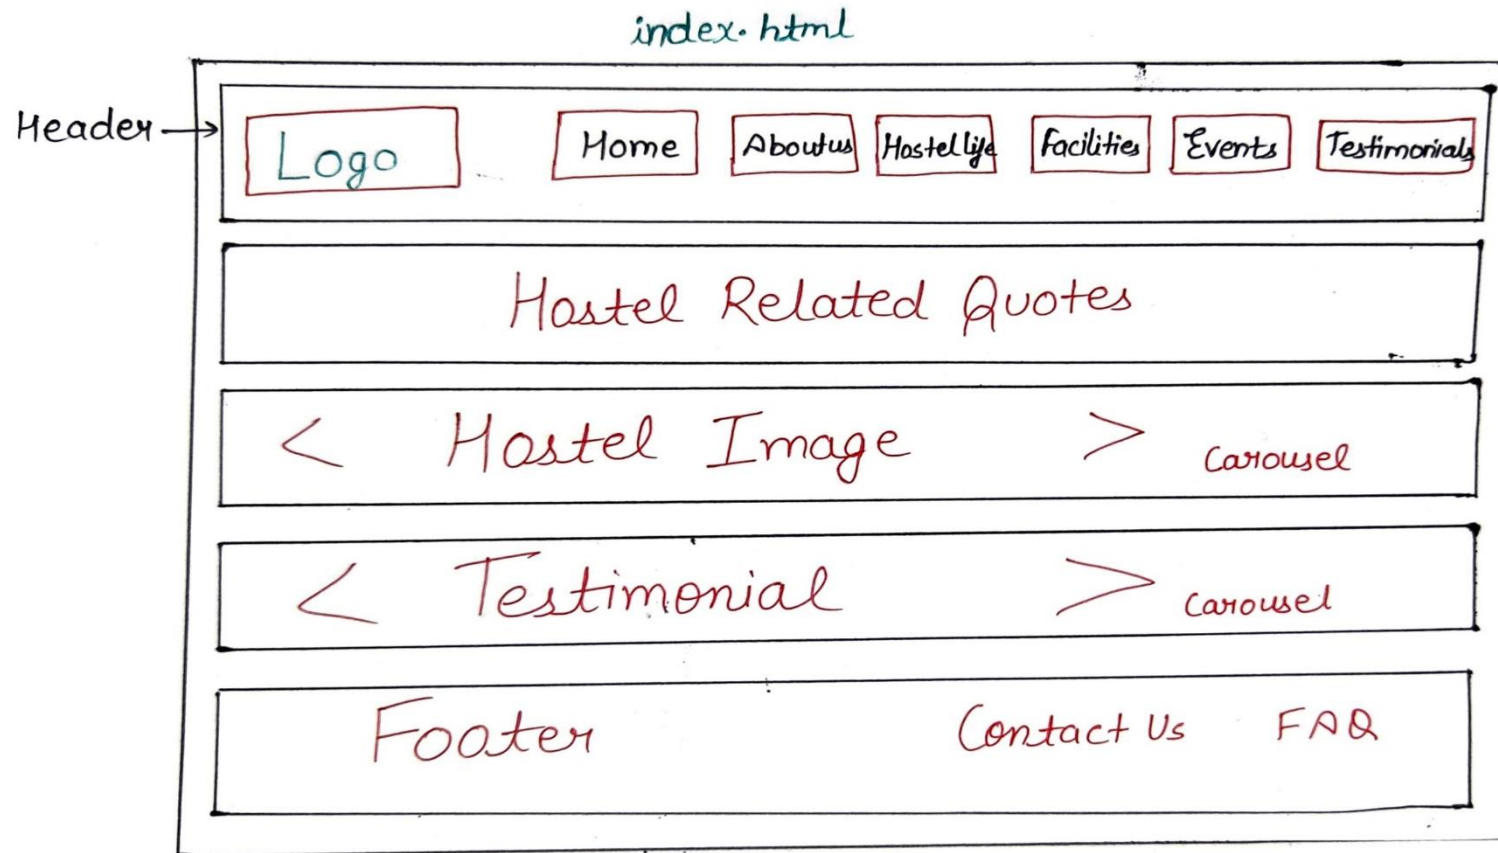

- The goal of making a web page about hostel life in college is to create a website that shows what it's really like to live in a college hostel.
- We want to help current and future college students by providing useful information and making the website interesting and enjoyable.
- Our specific objectives for this project are to provide comprehensive and informative content on the topic of hostel life in college.
- The web page will cover the following topics:

# Objective

---

- ❖ The different types of hostels room
- ❖ The rules and regulations of hostels
- ❖ The cost of living in a hostel
- ❖ The social and academic benefits of hostel life
- ❖ The challenges of hostel life

# Details about component

---

These are just some of the most common web components. There are many other components available, and the specific components that are used on a web page will vary depending on the purpose of the page.

- **Header/Footer:** These are the top and bottom sections of a web page, respectively. They typically contain important information such as the page title, navigation links, and copyright information.
- **Div:** A div is a generic HTML element that can be used to group other elements together. It is often used to create containers for layout purposes.
- **Navbar:** A navbar is a horizontal navigation bar that typically appears at the top of a web page. It provides links to important pages or sections of the site.

# Details about component

---

- **Carousel:** A carousel is a rotating slideshow of images or videos. It is often used to display product images or promotional content.
- **Card:** A card is a rectangular element that is typically used to display a single piece of information. It can contain text, images, and other elements.
- **Dropdown:** A dropdown is a menu that appears when a user clicks on an icon or text. It is often used to provide access to a list of options.
- **Image:** An image is a visual representation of something. It can be used to add visual interest to a web page or to convey information.

*Thank  
you*
